Message to our stockholders

I am pleased to present to you the financial statements and operating results of BEO Bancorp and Bank of Eastern Oregon for 2013. The results show continued improvement in profitability trends.

As we look back at 2013 we saw an agricultural economy that experienced decent performance. Grain and hay prices were down from their recent highs, with average to slightly below average production. Cattle prices continued their upward trajectory. Main Street faired relatively well as the regional and national economies slowly recover.

2013 was a very good year for BEO Bancorp with net income at an all-time high. Consolidated after tax net income for BEO Bancorp in 2013 was $2,673,000; up 8.6% from 2012. Return on Average Assets for 2013 was 0.92% compared to 0.90% in 2012. Return on Average Equity was 12.52% in 2013 vs. 13.23% in 2012. Net earnings per share were $2.54 in 2013 compared to 2012 level of $2.55. This slight decrease was brought on by an increased number of shares. The profitability trends by themselves are favorable and when they are compared to peer, they are quite impressive. Net interest income will always be a primary factor that drives profitability. 2013 results show net interest income up 9.5%. Even with the good performance metrics, we added $1,210,000 to the loan loss provision as we address our remaining problem credits and reserve for future growth in the portfolio as well as the cyclical nature of agriculture.

We are pleased with the continued, managed growth trends your Bank experienced in 2013. Stockholders' equity growth was strong going from $19,667,000 to $22,930,000; an increase of 16.6%. Total assets were at $299,083,000 up 5.0% year over year; deposits set another all-time high of $264,952,000 up 4.8% from 2012. Net loans increased 6.7% to $239,823,000 also a high point for the Bank.

We are often asked about interest rates and how long will the historically low interest rates last. We wish we knew. All indications point to the current rate environment lasting for at least the next one to two years. In spite of this interest rate environment the increase in deposits reveals a continued flight to safety as well as a lack of other safe or more lucrative investment alternatives. Our loan to deposit ratio compares favorably to peer institutions and factors into our net interest income and net interest margin which places us in the 97th percentile among peers. I see these factors as being indicative of the trust and loyalty that our customers place in your Bank. This trust does not happen by accident. I am extremely thankful to work with such a fine group of employees that strive daily to meet and exceed the expectations of our customers.

As shareholders, thank you for your continued investment and confidence in BEO Bancorp. I cordially invite you to attend our annual meeting of shareholders. We will provide a recap of 2013, elect three directors and offer a glimpse at what we expect in 2014. We will meet **Thursday, April 24, 2014 at 7:00 pm** at the St. Patrick's Catholic Church parish hall in Heppner, OR.

Sincerely,

Jeff L. Bailey

Independent Auditors' Report

To the Board of Directors
BEO Bancorp:

Report on the Financial Statements

We have audited the accompanying consolidated financial statements of BEO Bancorp and Subsidiary ("BEO") which comprise the consolidated balance sheets as of December 31, 2013 and 2012, and the related consolidated statements of income, comprehensive income, changes in stockholders' equity, and cash flows for the years then ended, and the related notes to the consolidated financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of BEO as of December 31, 2013 and 2012, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

The accompanying notes are an integral part of these consolidated financial statements.

1. Summary of Significant Accounting Policies:

Basis of Presentation – The consolidated financial statements include the accounts of BEO Bancorp ("Bancorp"), a bank holding company, and its wholly-owned subsidiary, Bank of Eastern Oregon (the "Bank"). All significant intercompany accounts and transactions have been eliminated in consolidation. Bancorp has also established subsidiary grantor trusts in connection with the issuance of trust preferred securities (see Note 11). In accordance with the requirements of ASC 810 the accounts and transactions of these trusts are not consolidated in the accompanying consolidated financial statements.

Description of Business - The Bank provides commercial and consumer financing, banking and mortgage lending and other services in Northeastern Oregon. Its activities include the usual lending and deposit functions of a commercial bank: commercial, agricultural, real estate, installment, credit card and mortgage loans; checking, money market, time deposit and savings accounts; internet banking and bill payment; automated teller machines and safe deposit facilities. Additionally, the Bank originates and sells mortgage loans into the secondary market and offers investment services.

Financial Statement Presentation – The preparation of the financial statements in conformity with U.S. generally accepted accounting principles (GAAP) requires management to make estimates and assumptions that affect reported amounts and related disclosures, and actual results could differ from those estimates. The most significant estimates are the allowance for loan losses and fair value estimates. The Company has evaluated subsequent events through March 8, 2013, the date the financial statements are available for distribution. Certain prior year amounts may have been reclassified to conform to the current year presentation. Such reclassifications have no effect on previously reported net income.

Cash and Cash Equivalents – For purposes of presentation in the consolidated statements of cash flows, cash and cash equivalents are defined as those amounts included in the balance sheet caption "cash and due from banks". Such amounts include interest bearing deposits and federal funds sold on a short-term basis and may exceed amounts insured by FDIC.

Investment Securities – Securities for which management has the positive intent and ability to hold to maturity are classified as held-to-maturity and are reported at cost adjusted for remaining balances of premiums or discounts.

Securities purchased with the intent to sell in the near term are classified as trading securities and are reported at estimated fair market value with unrealized gains or losses reported in non-interest income. The Bank had no trading securities at December 31, 2013 or 2012.

1. Summary of Significant Accounting Policies, Continued:

Securities not classified as held-to-maturity or as trading securities are classified as available-for-sale. Securities available-for-sale are held for indefinite periods of time and may be sold in response to changes in market interest rates, shifts in the maturity mix or concentration of bank assets or liabilities or to alleviate liquidity demands. Securities designated as available-for-sale are carried at estimated fair value. Unrealized gains and losses are excluded from earnings and are credited or charged to other comprehensive income in stockholders' equity, net of applicable deferred taxes. Interest income on debt securities is included in income using the effective interest method. Gains and losses realized on sales of securities are recognized on the specific identification method.

The Bank recognizes other-than-temporary impairments for debt securities classified as available for sale in accordance with ASC 320. Accordingly, the Bank assesses whether it intends to sell, or it is more likely than not that it will be required to sell a security before recovery of its amortized cost basis less any current-period credit losses. For debt securities that are considered other-than-temporarily impaired and that the Bank does not intend to sell and will not be required to sell prior to recovery of the amortized cost basis, the Bank separates the amount of the impairment into the amount that is credit related (credit loss component) and the amount due to all other factors. The credit loss component is recognized in earnings and is the difference between the security's amortized cost basis and the present value of its expected future cash flows discounted at the security's effective yield. The remaining difference between the security's fair value and the present value of future expected cash flows is due to factors that are not credit related and, therefore, is not required to be recognized as losses in the income statement, but is recognized in other comprehensive income. The Bank has not recognized an other-than-temporary impairment of its debt securities as management believes all unrealized losses on investment securities at December 31, 2013 are temporary (see note 3).

Loans and Income Recognition – Loans are stated at the amount of unpaid principal, net of deferred loan origination fees, premiums or discounts on purchased loans, and an allowance for loan losses. Interest on loans is calculated using the simple-interest method on daily balances of the principal amount outstanding. Accrual of interest is discontinued on a loan when management believes, after considering economic and business conditions and collection efforts that the borrower's financial condition is such that collection of the interest is doubtful. Cash receipts on non-accrual loans are first recorded as principal collections. Loan origination fees, net of associated direct costs, if significant, are amortized by the interest method over the contractual life of the loan. Premiums and discounts on loans purchased are amortized using the straight line method over a period management believes best matches the cash flow and risks associated with the loan.

1. Summary of Significant Accounting Policies, Continued:

Allowance for Loan Losses – The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that the collectibility of the principal is unlikely. The allowance is an amount that management considers adequate to absorb possible losses on existing loans that may become uncollectible based on evaluations of the collectibility of loans and prior loss experience. The evaluations take into consideration such factors as changes in the nature and value of the loan portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrower's ability to pay.

A loan is considered impaired when management believes that it is probable that all amounts will not be collected according to the contractual terms. An impaired loan is valued using the present value of expected cash flows discounted at the loan's effective interest rate, the observable market price of the loan or the estimated fair value of the loan's collateral or related guaranty. Loans deemed impaired have a specifically allocated reserve within the allowance for loan losses.

The allowance and provision are estimates that are necessarily subjective and may be adjusted as more current information becomes available. Any adjustment could be significant.

The Bank classifies reserves for potential losses on commitments to loan in other liabilities.

Federal and state bank regulatory agencies, as an integral part of their examination process, periodically review the Bank's reserve for loan losses. Such agencies may require the Bank to recognize additions to the reserve in the future based on their judgment of the information available to them at the time of their examinations.

Federal Home Loan Bank Stock – The investment in Federal Home Loan Bank ("FHLB") stock is a restricted investment carried at cost, which is based on the ultimate recoverability at par value. As a member of the FHLB system, the Bank is required to maintain a minimum level of investment in FHLB stock based on borrowings. At December 31, 2013, the minimum required investment was $101,200. The Bank may request redemption at par value of any stock in excess of the amount it is required to hold. Stock redemptions are at the discretion of the FHLB.

Property – Property is stated at cost, net of accumulated depreciation. Additions, betterments and replacements of major units are capitalized. Expenditures for normal maintenance, repairs and replacements of minor units are charged to expense as incurred. Gains or losses realized from sales or retirements are reflected in operations currently. Depreciation is computed by the straight-line method over the estimated useful lives of the assets.

1. Summary of Significant Accounting Policies, Continued:

Core Deposit Intangible – Core deposit intangible is stated at cost, net of accumulated amortization. Amortization is recorded on an accelerated basis through 2013, with periodic evaluation for impairment.

Foreclosed Assets – Assets acquired through, or in lieu of, loan foreclosure are held-for-sale and are initially recorded at fair value at the date of foreclosure based on current appraisals, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in other noninterest expense.

Advertising – Advertising costs are generally charged to expense during the year in which they are incurred.

Income Taxes – Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets and liabilities are calculated on differences between financial statement and tax bases of assets and liabilities using tax rates in effect for the year in which the differences are expected to reverse. Valuation allowances are established to reduce the net carrying amount of deferred tax assets if it is determined to be more likely than not, that all or some of the potential deferred tax asset will not be recognized.

Uncertain tax positions are accounted for in accordance with ASC 740 which prescribes recognition and measurement standards for uncertain income tax positions. The Standard provides guidance on recognition, de-recognition, interest, penalties and disclosure. There is no material impact of potential tax uncertainties on Bancorp's financial condition or results of operations at December 31, 2013. Tax returns for years subsequent to 2009 remain open to examination by these taxing jurisdictions.

Fair Value – Bancorp applies the hierarchy and framework for measuring fair value, disclosure about fair value measurements and the reliability of valuation inputs as provided in ASC 820. When determining the fair value, Bancorp considers the transaction to sell an asset or transfer a liability occurs in the most advantageous market for that asset or liability. Within the hierarchy, Level 1 instruments use observable market prices for the identical item in active markets and have the most reliable valuations. Level 2 instruments are valued through broker/dealer quotation or through market-observable inputs for similar items in active markets, including forward and spot prices, interest rates and volatilities. Level 3 instruments are valued using inputs not observable in an active market such as company-developed future cash flow estimates, and are considered the least reliable. Valuations for all of Bancorp's and the Bank's financial instruments fall within Levels 2 and 3.

1. Summary of Significant Accounting Policies, Continued:

Derivative Instruments – Bancorp and the Bank use a derivative financial instrument (interest rate swaps) to limit exposure to changes in interest rates related to a subordinated debenture. The derivatives entered into by Bancorp and the Bank are designated as cash flow hedge with perfect effectiveness between changes in the value of the interest rate swap and the hedged instrument (subordinated debenture liability). The derivative and related hedged debenture are recognized in the balance sheet at their fair value. Bancorp and the Bank formally documents all relationships between hedging instruments and formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivative that is used in the hedging transaction is highly effective in offsetting changes in fair values of hedged items.

Bancorp and the Bank would discontinue hedge accounting when: (a) it is determined that a derivative is no longer effective in offsetting changes in the fair value of the associated hedged item; (b) the derivative expires or is sold, terminated, or exercised; or (c) management determines that designation of the derivative as a hedge instrument is no longer appropriate. The hedged liability would no longer be adjusted for changes in fair value and the derivative would be carried at its fair value in the balance sheet, with changes in its fair value recognized in current-period earnings.

Recently Issued Accounting Pronouncements Adopted in 2013 – In December 2011 FASB issued Accounting Standard Update No. ASU 2011-11, *Receivables (Topic 310): Disclosures about Offsetting Assets and Liabilities.* In January 2013 FASB issued a clarification for *Disclosures about Offsetting Assets and Liabilities* with ASU No. 2013-01. These ASUs set forth the guidance applicable to derivatives accounted for in accordance with Topic 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement.

In February 2013 FASB issued Accounting Standard Update No. ASU 2013-03, *Clarifying the Scope and Applicability of a Particular Disclosure to Nonpublic Entities.* The main objective of this Update is to clarify the scope and applicability of a particular disclosure to nonpublic entities that resulted from the issuance of Accounting Standards Update No. 2011-04, *Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs*. Contrary to the stated intent of Update 2011-04 to exempt all nonpublic entities for a particular disclosure, that Update's amendments to Topic 825 suggested that nonpublic entities that have total assets of $100 million or more or that have one or more derivative instruments would not qualify for the intended exemption.

There was no material impact on the Bank's results of operations or financial condition upon adoption of the new standards.

Recently Issued Accounting Pronouncements Effective in 2013 and 2014 –In February 2013 FASB issued Accounting Standard Update No. ASU 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. The objective of this Update is to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments in this Update seek to attain that objective by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income of the amount being reclassified is required under U.S. generally accepted accounting principles (GAAP) to be reclassified in its entirety to net income. This update is effective for the Bank for the year ended December 31, 2014.

In January 2014 FASB issued Accounting Standard Update No. ASU 2014-04, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40): Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure*. The objective of the amendments in this Update is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. This update is effective for the Bank for the year ended December 31, 2015.

The Bank is evaluating the impact that these amendments have on future financial statements.

2. Cash and Due From Banks:

The Bank is required to maintain an average reserve balance with the Federal Reserve Bank or maintain such reserve balance in the form of cash. The required reserve balances at December 31, 2013 and 2012 were approximately $456,000 and $121,000, respectively, and were met by holding cash and maintaining an average balance with the Federal Reserve Bank.

The unrealized losses on investment securities were caused by interest rate increases subsequent to the purchase of the securities and are considered temporarily impaired. It is expected that the securities will not be settled at a price less than the amortized cost of the investment. Because the decline in fair value is attributable to changes in interest rates and not credit quality, and because the Bank has the ability and intent to hold these investments until a market price recovery or to maturity, the unrealized losses on these investments are not considered other-than-temporarily impaired.

3. Investment Securities, Continued:

The amortized cost and estimated fair value of investment securities at December 31, 2013 by contractual maturity are shown below. The average recorded investment in impaired loans was approximately $5,452,214 and $8,316,174 in 2013 and 2012, respectively. Interest income recognized on impaired loans totaled $150,647 and $190,313 in 2013 and 2012, respectively. Interest income which would have been realized on non-accrual loans if they had remained current and still accruing was approximately $233,564 and $283,074 in 2013 and 2012, respectively.

4. Loans, Continued:

There were no loans accounted for as Trouble Debt Restructurings (TDR) that occurred during the year ended December 31, 2013. The following is information regarding loans accounted for as TDR that occurred during the years ended December 31, 2012:

2012			Recorded Investment after modification			
	Number of TDR Loans	Recorded Investment Before Modification	Modified for Interest Rates	Modified for Repayment Terms	Modified for Interest Rates and Repayment Terms	Total
Farmland Loans	2	$2,331,658	$ -	$ -	$2,331,658	$ 2,331,658

Total	10	$5,841,621	$ -	$1,093,704	$4,747,917	$ 5,841,621

None of the loans accounted for as TDR were in default as of December 31, 2013. At December 31, 2013 the Bank had unfunded commitments on TDR loans of $36,956. There were $56,956 unfunded commitments on TDR loans at December 31, 2012. Loans are accounted for as TDR when significant concessions have been granted that would not have otherwise been considered except for the borrower's financial difficulties. Concessions may include extended repayment terms such as interest only payments or lengthened maturities, or interest rate modifications and are granted to improve the likelihood that the borrower will be able to repay the obligation. TDR loans are included in impaired loans and the methodology for evaluating credit losses and accrual status is the same as for other impaired loans.

5. Allowance for Loan Losses:

The Bank maintains an allowance for loan losses ("ALLL") to absorb losses resulting from the inherent risks of lending. The balance of the ALLL is reviewed at least quarterly to assess the adequacy relative to probable estimated losses within the loan portfolio. The methodology is consistent with the Contingencies and Receivables topics of the FASB ASC and did not significantly change during 2013 or 2012. The ALLL includes a general allowance based on quantitative and qualitative factors on non-impaired loans plus specific reserves on impaired loans established to account for credit attributes of the individual relationships. Credit risk is managed through established policies and procedures including lending limits, diversification, approval requirements, and an ongoing comprehensive review process. The review process includes assigning a numerical risk rating to a loan when originated, and then modifying that risk rating as circumstances dictate.

These Loan risk ratings are assigned as follows:

A rating of 1-2 indicates low apparent credit risk.
A rating of 3-4 indicates average to above average potential credit risk.
A rating of 5-6 indicates weaknesses and factors displaying potential credit risk that requires a higher level of management attention.
A rating of 7 indicates a probable loss but the amount is not specifically determined.
A rating of 8 indicates specific loss has been identified and charge-off is imminent.

One to three years	**8,405,296**	8,918,867
Over three years	**3,884,869**	3,406,904
	$ 53,421,617	$ 56,280,370

10. Borrowings:

At December 31, 2013, the Bank has unused credit available totaling approximately $44,200,000 from the Federal Home Loan Bank of Seattle, $20,000,000 of federal funds lines with correspondent banks and $5,000,000 with the Federal Reserve Bank of San Francisco. There were no balances outstanding on these credit lines at December 31, 2013 or December 31, 2012.

The Federal Home Loan Bank line of credit, when borrowed against, is secured by certain investment securities and real estate loans. The Federal Reserve Bank line of credit is secured by pledged real estate and agricultural loans.

11. Subordinated Debentures:

As of December 31, 2013, Bancorp had two wholly-owned trusts ("Trusts") that were formed to issue trust preferred securities and related common securities. The Trusts issued Capital Securities ("Trust Preferred Securities") and invested the proceeds in a like amount of Junior Subordinated Debentures ("Debentures") of BEO Bancorp. Interest distributions on the Trust Preferred Securities are payable quarterly and are deferrable, at Bancorp's option, for up to five years. The Debentures bear the same terms and interest rates as the related Trust Preferred Securities. The Debentures are the sole assets of the Trusts. Bancorp has unconditionally guaranteed all of the obligations of the Trusts.

The Trust Preferred Securities are mandatorily redeemable, in whole or in part, upon repayment of the underlying Debentures at their stated maturities or their earlier redemption. The Debentures are redeemable prior to maturity at Bancorp's option.

In accordance with provisions of ASC 810 the Trusts have not been consolidated in these financial statements. The $7,217,000 of Debentures issued to the Trusts as of December 31, 2013 is reflected as subordinated debentures in the consolidated balance sheets. The common stock issued by the Trusts is recorded in other assets (Note 8).

In December 2009 through March 2010 Bancorp issued a total of $4,105,000 in 7% 5-year Callable Convertible Subordinated Notes ("Notes") in a private offering with the primary purpose of providing capital to the Bank. The Notes are callable by Bancorp or convertible by the investors into common shares. The Notes rank senior in right of repayment to the Debentures. Interest is payable quarterly and may be deferred at Bancorp's option.

On February 15, 2012 Bancorp called $1,026,250 of the Notes. Upon notification of the call, all investors exercised their option to convert to common stock and Bancorp repurchased 69,864 of the 120,296 shares issued. On May 15, 2013 Bancorp called $1,530,000 which resulted in 109,785 shares being issued at the investors' option. Investors converted an additional 8,620 shares during 2013.

A summary of the terms of all subordinated debentures at December 31, 2013 is as follows:

	BEO Trust I	BEO Trust II	Callable-Convertible Subordinated Notes
Amount outstanding	$4,124,000	$3,093,000	$1,473,750

Short-term borrowings	**7,443**	329
Total interest expense	**$ 1,183,698**	$ 1,392,179

13. Benefit Plans:

The Bank has a 401(k) and employee stock ownership plan (ESOP) that covers substantially all employees. Employer contributions are determined annually by the Board of Directors. The ESOP may use employer contributions to purchase Bancorp stock. Shares of Bancorp stock are then credited to plan participants based on annual compensation. All investments of the ESOP are held in trust for the exclusive benefit of participating employees.

Compensation for plan participants is the total wages paid to participants by the Bank for each calendar year, excluding fringe benefits. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings.

Employer contributions charged to expense were $305,012 and $275,537 in 2013 and 2012, respectively. During 2013 and 2012 the plan purchased 7,683 and 13,210 shares of BEO Bancorp stock at a cumulative purchase price of $150,336 and $193,082, respectively. At December 31, 2013 the plan held 76,617 Bancorp shares, all of which were allocated to participants

The Bank is beneficiary of bank-owned life insurance (BOLI) to support life insurance and salary continuation benefits for certain key employees. At December 31, 2013 and 2012, the Bank recorded a salary continuation benefit obligation of $850,269 and $756,687, respectively. During 2013 and 2012 $72,471 and $72,471 was paid in benefits and the amount of expense charged to income was $166,052 and $160,884, respectively.

14. Income Taxes:

The provision for income taxes for the years ended December 31 consists of the following:

	2013	2012
Currently payable (refundable):		
Federal	**$1,132,985**	$ 821,000
State	**33,015**	15,000
	1,166,000	836,000

State	**(14,000)**	51,000
	(73,000)	270,000
	$1,093,000	$1,106,000

The provision for income taxes results in effective tax rates less than the federal income tax statutory rate. The reasons for the differences are as follows:

	2013	2012
Tax on income at federal statutory rate (34%)	**$1,280,646**	$1,213,121
State income tax, net of federal benefit	**21,790**	9,900
Nontaxable interest income, net of allocable interest expense	**(205,236)**	(221,475)
Other, net	**(4,200)**	104,454
	$1,093,000	$1,106,000

14. Income Taxes, Continued:

The provision for deferred income taxes results from timing differences in the recognition of transactions for financial statement and tax purposes. The nature and tax effects of these differences for the years ended December 31 are as follows:

	2013	2012
Deferred compensation not deducted for tax purposes	**$ (76,256)**	$ (37,045)
Loan origination costs	**3,651**	15,992
Loan loss deduction for tax purposes more (less) than provision for financial reporting purposes	**(474,774)**	272,237

Total deferred tax liabilities	**464,383**	450,433
Net deferred tax assets	**$ 698,607**	$ 779,617

15. Financial Instruments with Off-Balance-Sheet Risk:

In order to meet the financing needs of its customers, the Bank commits to extensions of credit and issues standby letters of credit. The Bank's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments. The Bank uses the same credit policies in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements.

Standby letters of credit written are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers.

Financial instruments with off-balance-sheet risk at December 31 are as follows:

	2013	2012
Commitments to extend credit	**$ 48,385,737**	$ 45,418,562
Standby letters of credit and financial guarantees written	**946,511**	825,000

16. Loans to Related Parties:

The Bank has granted loans to officers and directors. Such loans are made on substantially the same terms, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated parties. Activity with respect to these loans during the year ended December 31 was as follows:

	2013	2012
Balance, January 1	**$ 1,616,071**	$ 1,725,375
Net additions or renewals	**361,125**	879,763
Amounts collected or renewed	**(765,525)**	(989,067)
Balance, December 31	**$ 1,211,671**	$ 1,616,071

In addition, there were $957,852 and $1,115,166 in commitments to extend credit to directors and officers at December 31, 2013 and 2012, respectively, which are included as part of commitments in Note 15.

17. Fair Value Disclosures of Financial Instruments:

The following disclosures are made in accordance with provisions of ASC 825. The use of different assumptions and estimation methods could have a significant effect on fair value amounts. Accordingly, the estimates of fair value herein are not necessarily indicative of the amounts that might be realized in a current market exchange.

The estimated fair values of the financial instruments at December 31 are as follows:

	2013		2012	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial assets:				
Cash and cash equivalents	**$ 23,341,636**	**$23,341,636**	$23,101,474	$ 23,101,474

Accrued interest payable	**72,003**	**72,003**	89,773	89,773

Cash and Cash Equivalents – The fair value approximates carrying amount.

Securities – Fair value is based on quoted market prices. If a quoted market price is not available, fair value is estimated using quoted market prices from similar securities.

Loans – Fair value of fixed-rate loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. Variable rate loans not at contractual floors have carrying amounts that are a reasonable estimate of fair value. Impaired loans' fair values are estimated primarily at collateral values and consider credit risk.

Deposits – Fair value of demand, interest-bearing demand and savings deposits is the amount payable on demand at the reporting date. Fair value of time deposits is estimated using the interest rates currently offered for the deposits of similar remaining maturities. The estimated fair values of deposits do not take into account the benefit that results from low-cost funding such deposits provide.

17. Fair Value Disclosures of Financial Instruments, Continued:

Subordinated debentures – The fair value is estimated by discounting future cash flow at rates currently available for debt with similar terms and maturities.

Off-Balance-Sheet Financial Instruments – The carrying amount and fair value are based on fees charged for similar commitments and are not material.

The following table presents the Company's fair value hierarchy for those assets and liabilities measured at fair value:

17. Fair Value Disclosures of Financial Instruments, Continued

The fair value represents management's best estimates based on a range of methodologies and assumptions. For loans with doubt as to collectability and foreclosed assets expected cash flows are discounted using an appropriate rate considering the time of collection, credit risk, and the discount for the uncertainty of the flows. The value of collateral is also considered.

A roll-forward of the assets measured at Fair Value Using Unobservable Inputs (Level III) is as follows:

Fair Value Measurement Using Unobservable Inputs (Level III)

	Impaired loans net of reserves	Foreclosed assets	Total
Beginning balance 12/31/12	$ 3,001,921	$ 862,010	$ 3,863,931

18. Regulatory Matters:

Bancorp and the Bank are subject to the regulations of certain federal and state agencies and receive periodic examinations by those regulatory authorities. In addition, Bancorp and the Bank are subject to various regulatory capital requirements administered by the Federal Reserve Board ("FRB") and Federal Deposit Insurance Corporation ("FDIC"). Failure to meet minimum capital requirements can initiate certain mandatory – and possibly additional discretionary – actions by regulators that, if undertaken, could have a direct material effect on the financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, banks must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. Bancorp's and the Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by regulation to ensure capital adequacy require Bancorp and the Bank to maintain minimum amounts and ratios (set forth in the following table below) of Total and Tier I capital to risk-weighted assets, and of Tier I capital to leverage assets, all as defined in the regulations. Management believes, as of December 31, 2013, Bancorp and the Bank met all capital adequacy requirements to which it is subject.

As of December 31, 2013, the most recent notification from the FRB and FDIC categorized Bancorp and the Bank as well capitalized. To be categorized as well capitalized the Bank must maintain minimum Total risk-based, Tier I risk-based, and Tier I leverage ratios as set forth in the table. There are no conditions or events from that date through March 4, 2014 that management believes have changed the institution's category.

18. Regulatory Matters, Continued:
